# ACNE TREATMENT

Have you tried treating it yourself?

Are you are still unhappy with the results?

Dr. Tomchik has over 30 years of medical experience.

Dr. Tomchik can evaluate each person's unique medical condition(s) and recommend treatments that are appropriate for that person.

Dr. Tomchik can prescribe medications that are more effective than over the counter medications you find at the grocery store.

The cost is the same as a regular visit.

If you have an insurance then we can bill them.

- Find out what works for you

# WEIGHT LOSS PROGRAM TESTIMONIALS

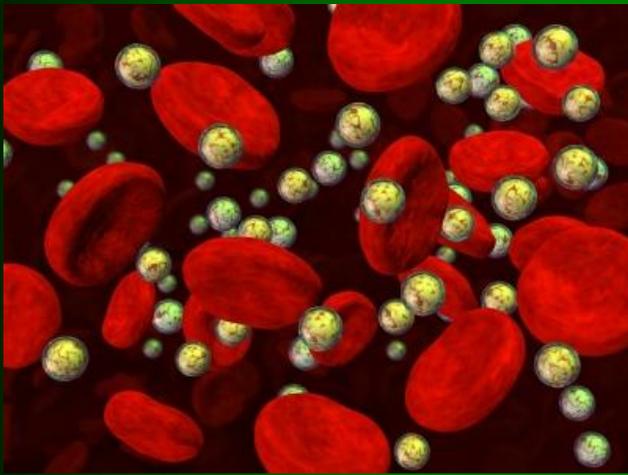

I started this program because I didn't like the way I looked in jeans and swim wear, but since I've been in the program I've lost 18 pounds, and look and feel great. - Elizabeth

I have been struggling with my weight for many years now. Due to my weight, I now take medications for my blood pressure. I also crossed over to the diabetes world--nothing serious but if I didn't care of it pretty soon it was going to become a problem.

So, when I heard about the weight program that Dr. Tomchik was offering I said to myself why not try it--since everything else has failed. I have been on the program for about a few months now. Being on this program has really helped me control my hunger and improve my eating habits. I would recommend this program to anyone to try. - Mayra

I, myself, have had trouble getting rid of those extra pounds, so I was apprehensive about the program, but when I started the program I began to see results after just one week! I had tons of energy, I was hardly hungry, and I couldn't believe it was actually working. After one month I lost 15 pounds. The good thing about this program is you control everything. You can start when you want and stop when you want, and still maintain a weight that is right for you. For this reason, I utilize the program to this day. - Marlene
